Multi-needle double-chain circular sewing machine

UN008 series of multi-needle machine is different from general chain sewing machine in its adoption of lever structure; with lever and wire, it forms a loop. Half-cylinder body design makes it convenient to sew loop-shaped clothes. With various needle gauges, the machine is able to be installed up to 33 needles within a scope of 153.6mm. Pop-up staff gauge structure makes it easy for threading.
